address Kirkebjerg Allé 25, 2720, København

PROFILE

As a MSc student at the Technical University of Denmark, I am currently focusing on Big Data, Computer Security and Cloud Services. I seek a full-time opportunity to utilize my skills on the IT sector, mostly developed from projects throughout my working and educational experience. It is a vision to be a part of a team in order to work on cloud infrastructures, design and implement solutions for complex business problems, involving large scale data warehousing, real-time analytics and reporting solutions. Currently employed in a part-time student job at JustWeb.

WORK EXPERIENCE

JustWeb *2015(Oct)–Present* Backend Engineer, JUSTWEB — Copenhagen

- Backend engineering in Azure Cloud Services. Design and implementation of a set of resources (Web apps, Mobile Apps, Backend REST APIs, SQL Databases) in cloud infrastructure on the Express web framework of node.js.
- Backend engineering in cloud infrastructure parse.com. Cloud code development and database architecture using the Javascript SDK of Parse.
- Development of an integration platform using Rest architecture deployed in PHP and curl

Brand Universe *2013–2014 (1 year)* Web Developer, BRAND UNIVERSE — Copenhagen

- Front-end and Back-end development of websites using HTML, CSS, PHP, MySQL and javascript.
- Web-banner and poster implementation in Adobe suite.
- Video editing.
- Newsletter design and coding.
- Newsletter campaigns and google analytics responsible.
